

# PRICING

## EVauto SYSTEM PRICING HAS TWO OPTIONS:

### 1 LEASE

Provides a 60-month operating lease for the EVauto hardware, software, and ongoing support. Customer has the option to extend the lease beyond the initial period. Payments are due monthly.

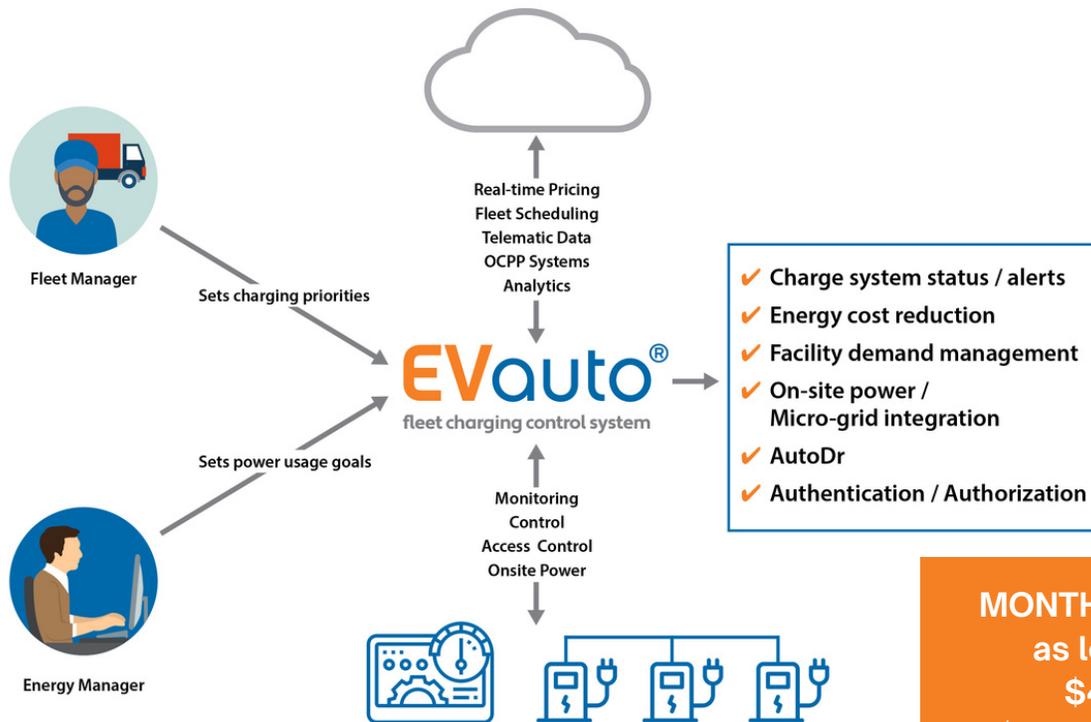

### 2 CAPITAL PURCHASE

Includes the cost for EVauto hardware, software and 60 months of ongoing support. Customer owns system hardware and has the option to continue support beyond the initial period. Payment in full is due at the outset of the Agreement.

The standard EVauto Base System gives you the ability to customize system settings based on your specific needs.

Standard features included in the Base Unit:

- 24/7 Control
- Time-of-Use Tariff Optimization
- Custom Site Dashboard
- Simplified Data Analytics
- User-Scheduled Demand Response
- 60-month Support Agreement
- Peak Demand Management
- Automatic Charging Issue Alerts
- Proprietary Rules Engine
- Automatic Weather Adjustments

**MONTHLY COST**  
as low as  
**\$400**  
+ \$30 per charger

## PRICING

### Lease Price (Monthly Cost):

Monthly Price	Base Unit (first charge bank)	+	Cost per Charger
MODBUS / OPC-UA	\$400	+	\$30
OCPP 1.6j	\$420	+	\$32

**Please Note:**

- This pricing applies to fleet charging systems with 10 or more chargers. If your system has fewer than 10 chargers, per charger costs will be at the 10-unit rate.
- A “Charge Bank” is a group of chargers that use the same power and networking technology.
- A robust standard security configuration is included in the base price. Customized security configurations, including customer hosting, will be quoted on a case-by-case basis.
- The Base System price includes remote start-up commissioning and online training after the system has been installed.
- Panel installation, control wiring to chargers, and external network switching is not included in the base price and will vary based on the unique characteristics of each site’s charging infrastructure.
- Capital purchase options are available. Please contact us for pricing.
